MUMMIES Don't worry about becoming a victim of the "mummy's curse." There's no such thing! A mummy is nothing more than a preserved body. • Before an ancient Egyptian body was mummified, dental work was often done on the teeth! • Mummified pets were often buried with ancient Egyptians in their tombs! • Mummies were buried underground, standing stiffly upright, by the Chinchorro Indians of South America! • Mummies found in the peat bogs of Denmark were offerings to the gods. • Ground-up mummies were used as medicine in medieval times! • Mummy unwrapping was supertime entertainment in the 19th-century England! Learn all about mummies and why people made them. Maybe one day you'll have a chance to see one!
